

San Bernardino
ONTARIO, CALIF.

J. S. Armstrong

Sept. 21, 1934 samples of
nuts rec'd from 41357,
8 and 9. all are typical

Japs in appearance. Nuts

too dry for sampling. Armstrong

asked if nuts came directly from

these scions. RBC. Nuts filed.

10/30/34 Advises nuts were collected from

above scions, and that they are considering

propagating # 41359 for the trade.

11/22/33 - A few trees of each number alive. #41359

has made fair size tree, 12 ft tall, &

looks promising. They are propagating.

2/8/23 - 20 scions #41357

C. pumila x crenata

2/8/23 - 10 scions #41358 lot of budded trees

C. pumila x crenata

2/8/23 - 10 scions #41359 lot of budded trees

C. pumila x crenata

2/8/23 - 10 scions #41360

C. pumila x crenata

45659 - lot of budded trees,

propagating # 41359 for the trade.

has made fair size tree, 12 ft tall, &

looks promising. They are propagating.
