2/14/44 supposed to have been planted on his farm, per BSC.

February 16, 1944

Mr. J. P. Porter
Department of Botany
University of Tennessee
Knoxville, Tennessee

Dear Mr. Porter:

In the spring of 1940 we sent you about 240 chestnut seedlings of various types. Could you at this time give us a report of how many are living? If this information is based on the number of each variety or species sent to you, giving our accession numbers, we would appreciate it very much.

Very truly yours,

Russell B. Clapper
Assistant Pathologist
