

CPAT FULL SESSION

A five (5) day class and consists of 2 orientations, 2 practice tests and final CPAT is specifically designed for the first time candidate. You have 3 opportunities to take the exam.

The presentations at the two orientations are the same. It will explain the testing process and how the equipment works. You will have the chance to ask questions and try the testing equipment. The pass rate of those who attend the orientations is higher than for those who do not. The two practice tests are the same and we attempt to run the practice test under actual testing conditions. If the test is run under actual testing conditions and you successfully complete the test this is considered a PASS and you will not need to attend any further testing. At the end of each test, you must report to the rehab area to be evaluated, complete the required paperwork and retrieve your photo identification.
