

# NOT A NUMBER

## FACILITATOR CERTIFICATION TRAINING

Developed by **LOVE146**

*Not a Number* is an interactive five-module prevention curriculum designed to teach youth how to protect themselves from human trafficking and exploitation through information, critical thinking, and skill development. The program integrates a holistic view of the issue by focusing on respect, empathy, individual strengths, and the relationship between personal and societal pressures that create or increase vulnerabilities. Through open conversations, engaging activities, the use of media, and opportunities for disclosures, participants find ways to move beyond awareness to behavioral change.

The training is designed to equip professionals to implement *Not a Number*. It will include:

- Training on human trafficking and commercial sexual exploitation of children
- Modeling of *Not a Number* modules
- Coaching on facilitation techniques with diverse settings and appropriate response to disclosures
- *Not a Number* participant teach-back

To attend the training, the participant's agency will be required to sign a licensing agreement. At the conclusion of the training, participants who have successfully completed the training will be certified to implement *Not a Number* through their respective agency's license.
