& REMEDIAL ACTION PLAN

STATE OF CONNECTICUT
OFFICE OF POLICY AND
MANAGEMENT (ADRIAEN'S
LANDING, HARTFORD) : **MARCH 9, 2001**

FINAL DECISION

Having reviewed the hearing officers' *Reports* in the above-noted matters, I affirm the recommendation to APPROVE the Remedial Action Plan including the additional conditions proposed by the hearing officer. Further, I affirm the recommendation of the hearing officer regarding the applications for permits and registrations to conduct regulated activities at Adriaen's Landing in Hartford, Connecticut.

Accordingly, staff shall prepare for my signature the following: New Source Review permits to construct and operate a 1006 BHp diesel engine generator and an 85 BHp diesel engine generator; authorization to construct and/or operate a 100 kilowatt diesel engine generator and a 50 kilowatt diesel engine generator under a general permit to construct and/or operate an emergency engine; and Certificates of Registration to discharge groundwater remediation wastewater to the sanitary sewer under a general permit for the discharge of groundwater remediation wastewater to the sanitary sewer and storm water associated with onsite dewatering and a storm water management plan.

In addition, I adopt the recommendation of the hearing officer regarding air emissions from diesel generators and diesel powered construction equipment for the applicant to: (a) evaluate the feasibility and practicality of installing devices such as catalytic converters or particulate traps to reduce emissions on the four diesel engine generators that require permits and from trucks and other construction equipment that will be utilized during the construction period for the project; and (b) encourage contractors selected to work on the project to utilize such devices, if reasonable.
