Reference for Regulatory Jurisdiction in Tidal Waters and Wetlands

In the tidal, coastal **or** navigable waters of the state waterward of the <u>coastal jurisdiction line</u>, the Department of Energy and Environmental Protection regulates: dredging; the erection of structures; the placement of fill; and, work incidental thereto pursuant to Connecticut General Statutes (CGS) Section 22a-359. Activities within tidal wetlands are regulated pursuant to CGS Section 22a-32. Your activity may be regulated by both CGS Sections 221-359 and 22a-32.

One of the following regulatory limits will apply to your activity:

Coastal Jurisdiction Line (CJL) - For activities not within tidal wetlands, the CJL is the upland limit of state regulatory jurisdiction, CGS Section 22a-359(c).

Mean High Water (**MHW**) - For projects located upstream of a tide gate, dam or weir, use MHW. The use of MHW would not apply to areas where a culvert, pipe, or narrow channel is causing a restriction as the *purpose and function* of such devices are not to modify the flow of tidal water (their purpose is to *convey* water).

Tidal Wetland Boundary - Use the tidal wetland boundary if tidal wetland vegetation is located landward of CJL or MHW. The upland limit of tidal wetlands is one foot above local extreme high water, Connecticut General Statutes (CGS) Section 22a-29(2). Local extreme high water is defined in Section 22a-30-2(h) of the *Tidal Wetlands Regulations* as the elevation of the one year frequency tidal flood at a particular location as shown on the most recently adopted U.S. Army Corps of Engineers tidal flood profile, <u>https://www.fema.gov/media-library-data/1383243270931-</u>

In accordance with CGS Sec. 22a-29(2) "Wetland" means those areas which border on or lie beneath tidal waters, such as, but not limited to banks, bogs, salt marsh, swamps, meadows, flats, or other low lands subject to tidal action, *including those areas now or formerly connected to tidal waters*, and whose surface is at or below an elevation of one foot above local extreme high water; and upon which may grow or be capable of growing some, but not necessarily all, of the following:

Acer rubrum	red maple
Acorus calamus	sweet flag
Agrostis palustris	bent grass
Alisma triviale	water-plantain
Alnus rugosa	speckled alder
Alnus serrulata	common alder
Calla palustris	water-arum
Caltha palustris	marsh marigold
Clethra alnifolia	sweet pepper-bush
Cornus amomum	red willow
Cornus obliqua	silky dogwood
Cornus stolonifera	red osier
Distichlis spicata	spike grass
Dryopteris thelypteris	marsh fern
Eleocharis rostellata	spike rush
Eupatorium purpureum	joe pye weed
Eupatorium maculatum	
_	

Plant list from CGS Sec. 22a-29(2), taxonomy not updated.

Eupatorium perfoliatum	thoroughwort
Heteranthera dubia	water stargrass
Hibiscus palustris	marshmallow
Hierochloe odorata	sweet grass
Impatiens capensis	jewelweed
Iris prismatica pursh	slender blue flag
Iris pseudacorus	yellow iris
Iris versicolor	blue flag
Iva frutescens var. oraria	high-tide bush
Juncus effusus	soft rush
Juncus gerardi	black grass
Limonium carolinianum	sea lavender
Limonium nashi	
Lythrum alatum,	loosestrife
lythrum salicaria	
Mikania scandens	climbing hemp-weed
Nuphar variegatum nuphar advena	spatter-dock
Onoclea sensibilis	sensitive fern
Osmunda cinnamomea	cinnamon fern
Osmunda claytoniana	interrupted fern
Osmunda regalis	royal fern
Panicum virgatum	switch grass
Peltandra virginica	tuckahoe
Polygonum arifolium	halberd-leaved tearthumb
Polygonum sagittatum	arrow-leaved tearthumb
Pontederia cordata	pickerelweed
Rhododendron viscosum	swamp honeysuckle
Rhus radicans	poison ivy
Rhus vernix	poison sumac
Rosa palustris	swamp rose
Sagittaria subulata,	arrowhead
Sagittaria graminea,	
Sagittaria eatoni,	
Sagittaria engelmanniania	
Salicornia Europaea, and	saltworts
Salicornia bigelovii	
Saururus cernuus	lizard's tail
Scirpus americana	chairmaker's rush
Scirpus robustus and	saltmarsh bulrushes
Scirpus paludosus var. atlanticus	
Sparganium eurycarpum,	bur-reed family
Sparganium androcladum,	-
Sparganium americanum,	
Sparganium chlorocarpum,	
Sparganium angustifolium,	
Sparganium fluctuans, and	
Sparganium minimum	
Spartina alterniflora	saltmarsh grass
Spartina patens	salt meadow grass
Spartina pectinata	tall cordgrass
Ŝpergularia marina	sand spurrey
Symplocarpus foetidus	skunk cabbage
Typha angustifolia, and	cattails

Section 22a-30-2(g) of the Tidal Wetlands Regulations defines "*Areas formerly connected to tidal waters*" as those areas which have retained tidal wetland soil characteristics, which can support some but not necessarily all of the vegetation specified in section 22a-29 of the General Statutes upon reestablishment of a tidal connection, and to which a tidal connection can be reestablished. Areas formerly connected to tidal waters shall not include:

(1) Areas which have been filled to an elevation greater than one foot above local extreme high water where such filling occurred prior to 1972 or to the adoption of a tidal wetland map for such area pursuant to CGS 22a-30, whichever is later;

(2) Areas to which a tidal connection has been permanently blocked or severed and where re-establishment of a tidal connection would endanger existing structures for which alternative means of protection such as floodproofing and elevation are not feasible; or

(3) Areas which are no longer wetland but which are another coastal resource as defined by CGS 22a-93 and which function as a healthy, stable habitat.
