

"One World, One Stop"

Who is Reverse Solutions?

Reverse Solutions is a reverse logistics company that manages the returns from some of the largest grocery retailers in the Northeast.

Who is Reverse Recycling?

Reverse Recycling works with Reverse Solutions to find alternative diversion methods for materials generated from Reverse Solutions and their other clients.

Who is Vortex Man?

Vortex Man is a comic book super hero that we have created to help raise awareness of the ever growing problem that affects our world. We as a society have become disposable and this mentality is drastically destroying our planet and we need to stop the bleeding.

Reverse Solutions

Reverse Solutions will scan any returns from their clients and find alternative uses through liquidation channels for these returns based on their classification:

1. Discontinued
2. Close Coded
3. Out Dated

Reverse Recycling

When Reverse Solutions has exhausted all avenues for alternative uses then Reverse Recycling steps in to find an alternative use through any of the following options:

1. Animal Feed Programs
2. Anaerobic Digestion
3. Trash to Energy

How do you close the loop?

Manufacturer

Trucking

Warehouse /
Distributor

Retailer

Consumer

We feel that is not only the responsibility of the manufacturer to promote sustainable packaging but it is also up to the consumer to do their part by closing the loop down the line from the manufacturer by properly recycling left over packaging.

Packaging does not need to change, just perception. If we can change the way a consumer views left over packaging by adding value to the packaging, more consumers would likely take on the social responsibility of recycling if there was a reward for the task.

Diversion in Every Department

Front End

Dairy

Frozen foods

Water / Soda

Dry Grocery / Candy

General Merchandise

Health, Beauty, and Cosmetics

Drugs / Pharmacy

Management Offices

Break Rooms

Warehouse

Sustainable Solutions

Reverse Recycling's knowledge and understanding of the vast variety of waste streams throughout various industries allows us to effectively identify and divert many recyclable commodities away from the landfills.

Industries we Serve

Corporate Offices / Campuses
Grocery Stores / Food Market Chains
Retailers
Distributors / Manufactures
School Districts / Colleges
Property Management
Apartment / Condo Associations
Hospitals
Churches

Most Commonly Diverted Commodities

- Single stream /paper, cardboard, cans, plastic & glass bottles and containers
- Reconstituting products/find an alternative use for your product beside the landfill
- E-waste / computers, phones, batteries, printers, fax, copiers, servers and mainframes
- Plastic, Shrink wrap / all grades
- Cardboard / paper / all grades
- Food waste / organics / green waste
- Fluorescent lamps & ballast
- Metal / all grades of ferrous and non ferrous
- Carpet / Fiber / Pads
- Construction Debris / Pallets / Wood

Vortex Man – From an Idea to Action

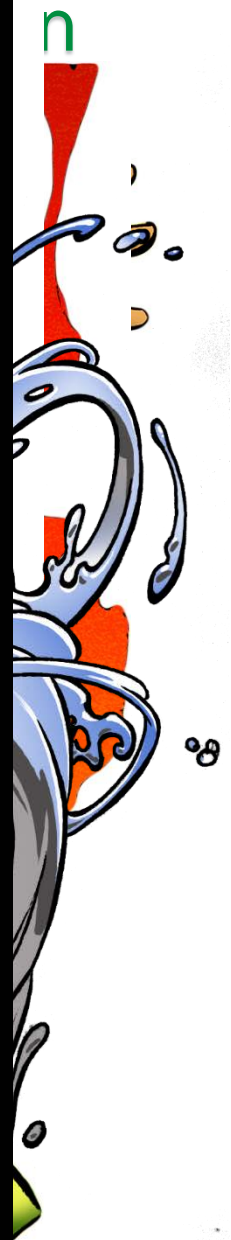

LT. FILTERBERG

A MAN-SHAPED MASS OF GREASE AND CIGARETTE BUTTS, CONSUMED BY A CRAVING HE CAN NEVER SATISFY.

A NAZI SPY TRAPPED IN POSTWAR LONDON HIDES OUT IN THE SEWERS, CLUTCHING A VIAL OF MYSTERIOUS FLUID HE'D STOLEN FROM A SECRET WARTIME LAB. EMERGING ONLY AT NIGHT TO STEAL FOOD AND CIGARETTES, HE IS DISCOVERED, AND FLEES UNDERGROUND... RIGHT INTO A "FATBERG", A HUGE MASS OF GREASE AND OIL, MIXED WITH PIECES OF PLASTIC. IT BURSTS, AND HE IS CAUGHT IN THE DELUGE, CHOKING, AND BURNING FROM THE FLUID FROM THE SHATTERED VIAL. WHEN HE WAKES HE IS NO LONGER TRULY HUMAN...
