Jim, these are my comments on the Draft GP for Discharges of Miscellaneous Sewer Compatible Wastewater from Industrial Users:

1. Section 4, (c), (1), (A) – With regard to registration fees, is the intent of the GP to leave it so open ended that a POTW Authority can change whatever they want? How will a POTW Authority determine what the registration fees will be? Is the intent of the GP to allow different POTW Authorities to charge different registration fees? This would create confusion for facilities that have locations in multiple towns. It seems to make more sense that the POTW Authorities and DEEP should get together to create a registration fee schedule.
2. With regard to any registration fee schedule, reduced rates should be considered for state agencies and municipalities (assuming all state agencies and municipalities are classified as industrial users?).
3. Section 4, (h), (1) – The last sentence should be deleted: ~~Any registration refiled after such a rejection shall be accompanied by the applicable fee as determined by the POTW Authority.~~ The registration fee should be a one-time submittal at the time of initial registration. A registrant should not have to pay an additional fee to re-submit the registration after rejection.
4. The definition of “Industrial User” should be expanded. Are all state, municipal, and federal agencies, state/federal/private institutions, municipalities, hospitals, commercial establishments, etc. classified as industrial users and subject to the permit requirements?

Please let me know when the response to comments is available.

Thanks,

Richard Pease
