1. Estimates of HIV prevalence and undiagnosed infection with relative standard errors (RSE) >=30% should be interpreted with caution.

2. Reported (not estimated) cases for adults and adolescents. Does not include anyone with a pediatric transmission category.

3. Subgroups may not add to the column total due to rounding.

4. Race and transmission categories not shown had RSE>50%.

5. Source: HIV Surveillance Registry for cases reported through December 2019.
