

**State of Connecticut – Department of Public Health
Drinking Water State Revolving Fund (DWSRF)**

Green Project Information Form

If your project contains “green” elements, you may utilize this form to identify those components that are for Green Infrastructure, Energy Efficiency, Water Efficiency, or other Environmentally Innovative activity. Currently, there are no federal requirements to provide a minimum amount of funding for “green” elements, however, should this become a requirement in the future, the Department of Public Health will use the information provided to determine potential funding priorities. Applicants that wish their project to be considered to have a green component must complete this form and provide justification.

If a project is not considered categorical “green”, a business case is required for justification to consider an item or activity “green”. The US Environmental Protection Agency (EPA) has provided guidance and business case examples to assist in evaluating the green elements of a project. For each project that will incorporate a “green” component(s), complete this cover sheet and a business case for all applicable green project items. Business cases shall be developed based on the guidance (see separate document).

PWS Name: _____ PWSID: _____

Project Name: _____

Total Estimated Project Cost: \$_____

Type of “Green” Element(s) included in this project and whether you believe the project is “categorical” or requires a “business case”. This form, and any corresponding business case for each box that is checked, must be completed and submitted with the **DWSRF Eligibility Application**.
