Social Contract

1. Based on a Solid Assessment
2. Safe
3. Respect expertise in the room
4. Learn by doing with self reflection
5. Iterative process
6. Mindful of adult learning principles

Collaborative Learning is a way to “do”

Integrated Watershed Management for Source Water Protection

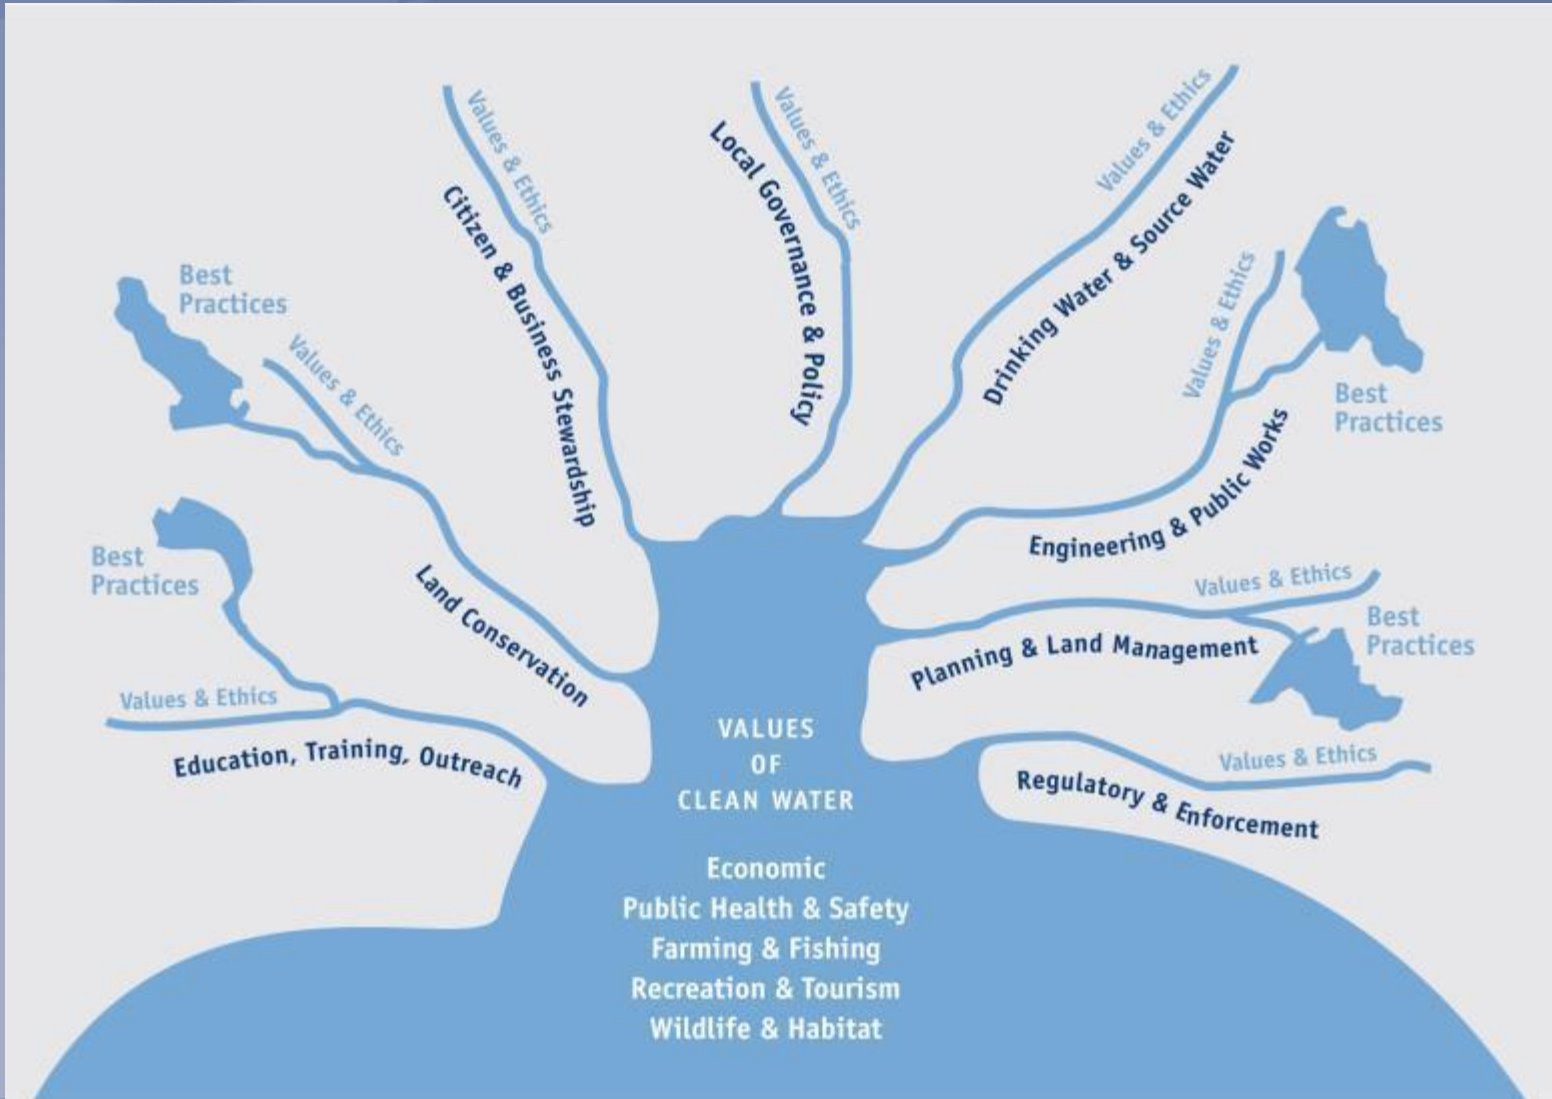

1. Sustaining ecosystem services that people care about
2. Place-based where people live, work, and play
3. Holistic, based on vision of desired future outcomes

Collaborative Learning Engages The Kaleidoscope of Expertise to Improve Water Protection

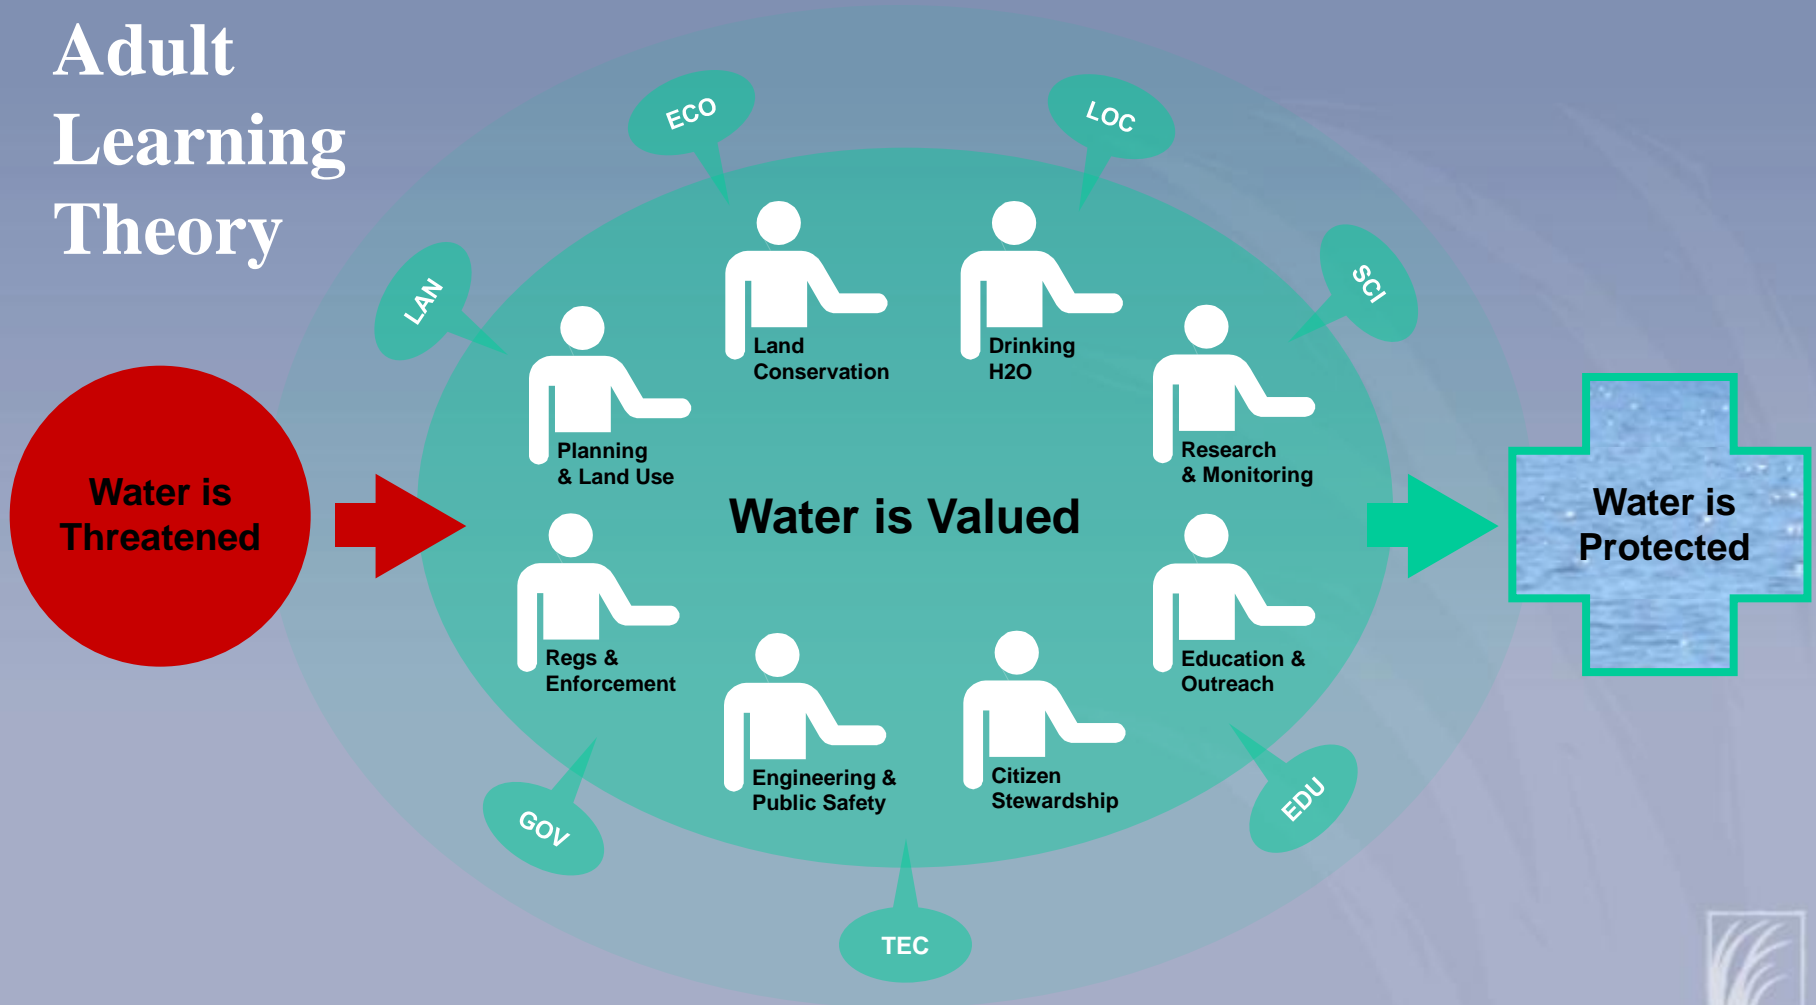

Collaborative Learning focuses on the Social Landscape That influences the Biophysical Landscape

Collaborative Learning designs events to engage the Kaleidoscope of Expertise as a Resource not a Receptacle

Adult Learning Theory

Implementing a Collaborative Learning Event

1. The “Way I See It...”
2. Listening for *most promising ideas*
3. *Most promising ideas* brainstorm
4. Ideas to Actions Worksheet & Measures of Success

Listening for “most promising idea”

- Partner -up and share your most promising idea uninterrupted for 5 minutes (each)
- Listener keeps time
- Total time for both to share 20 minutes
- Primes the cognitive pump for brainstorm to follow
- Make notes on worksheets after returning from walk

Promising Ideas ...

Make the work that someone is already doing easier

Are achievable in the timeframe of the project

Are connected by a clear path to desired outcomes

May be the first step of a long-term strategy

Respect the realities of the culture within stakeholders work

Promising Ideas . .

Provide missing information vital to the project

Identify key stakeholders not present in the room

Connect to important policy initiatives to accomplish outcomes

Identify concrete management practices that link to outcomes

Ideas to Action Worksheet

Most promising idea	How will this idea improve the situation? OUTCOME	What actions would make this idea a reality	Who needs to be involved to implement the idea?	What do we need to be aware of?
Identify sources of stormwater pollution through monitoring land-based runoff	Policies and management actions can be targeted to known sources and improvements in water quality can be compared against a baseline	<ol style="list-style-type: none"> 1. Examine existing water quality data for hot spots 2. Conduct field surveys for evidence of illicit discharges 3. Record pollution sites in GIS database 	<ol style="list-style-type: none"> 1. Field Inspector 2. Code enforcement 3. Project team 	<p>Take action to find evidence for and quantify land based runoff.</p> <p>Important to examine our assumptions and identify the source of inputs. Identify reasons for inaction on known sources.</p>

Measures of Success Worksheet

Action Items	Measures of Success	Accountability	Comments
<p><i>1. Examine existing water quality data for pollution hot spots</i></p>	<p><i>Existing data is examined for geographic scope, sampling timeframe, database is created; hot spots are mapped</i></p>	<p><i>Field Inspector On-going task</i></p>	<p><i>Identify gaps in coverage of existing sampling regime. Share results within the sampling network.</i></p>
<p><i>2. Conduct field surveys for evidence of previously undetected illicit discharge</i></p>	<p><i>Fishing Creek watershed survey completed Summer 2014</i></p>	<p><i>Municipal stormwater staff and Watershed Alliance members</i></p>	<p><i>Training will be needed and volunteers supervised</i></p>

A Story about an Award Winning Watershed Partnership

The Salmon Falls Watershed Collaborative
*2012 Winner of the United States
Clean Water Alliance Water Prize*

5 Ingredients for Success

1. **Visionary Leadership**
2. **Funding to implement the vision**
3. **Committed partners willing to seek synergy**
4. **A rigorous methodology for learning and engagement**
5. **Partnership support and communication**

Salmon Falls Watershed Collaborative

Working beyond Borders
to Protect Water in the Salmon Falls Watershed, Maine and New Hampshire

Phase I: Collaborative Learning Assessment

Improving the Relationship aspect of the situation

- Who will provide stakeholder input?
- How can stakeholders be engaged in the Collaborative ?
- What is the status of existing knowledge, planning, management and conservation efforts in the communities of the watershed ?

Partners in the *Collaborative* Share the Mission A “Community of Practice”

- Piscataqua Region Estuaries Partnership
- Acton Wakefield Watersheds Alliance
- City of Rochester
- City of Somersworth
- EPA
- Granite State Rural Water Association
- Great Bay NERR
- Southeast Watershed Alliance
- Strafford Regional Planning Commission
- Town of Berwick
- Trust for Public Lands
- USDA
- Maine Center for Disease Control
- Maine DEP
- Maine Forest Service
- Maine NEMO Program
- Maine Rural Water Association
- Moose Mountains Regional Greenways
- NHDES
- South Berwick Water District
- US Forest Service
- Wells National Estuarine Research Reserve
- York County Soil and Water Conservation District

Engage the Kaleidoscope of Expertise

A Watershed Protection System (Feurt, 2008)

Phase 2: Designing Collaborative Learning events to make progress developing a Watershed Action Plan

1. Monthly Conference Calls
2. Basecamp to Manage Team Communication
3. Quarterly Face to Face Meetings
4. Field Based Trainings
5. Beyond Borders Workshop
6. Development of Action Plan
7. Professional and Community Outreach
8. Continue Professional Practice

Evaluation as each event occurs to guide the progress on developing the action plan

Phase 3: Implement “Beyond Borders” Workshop to Engage Stakeholders in the *Collaborative*

30 drinking water sources are represented by participants in the workshop

Installation of Stormwater BMP

Pennichuck Brook, Pennichuck Water Works

Installation of Rain Garden and Low Impact Development and Stormwater BMPs

Tri-Town Aquifer, Towns of Belmont, Northfield and Tilton

Local Groundwater Zoning Ordinances Adopted in 2010

Evaluate success at engaging the right people in the Workshop to provide input into action items

The Workshop Generates Ideas for the Action Plan - those ideas must be evaluated

Working in small groups
stakeholders focus on work
related challenges

1. What are the values of water that you protect in your work?
2. What are the threats to water that you deal with in your work?
3. What are your current top priorities related to protecting water from threats?

Barbara Miller - killed w/ training
Program for citizen action/esp
Comp out/does/...

Tom Willis - some Team of some with
Public water & utilities -

Peter King - Team of some with
planner

James ~~Smith~~ - some weight engineering

Richard Hunter - top -
Sustainable planer - lamping over water

Travis - EPA report 2
with 3000 engineering etc

Climate development -
Conservation + H2O shed
Buildout
education
C10
Top of summit D

a) C10 - positive force as opposed to fighting against pollution etc
b) some development - water - build out water bill

One consistent model to use for all the states
- PP and that education
- use of common as
- compatible across the countries
- better than for information exchange

- Groups generated ideas in 5 Categories:
1. Information needs
 2. Education and Outreach
 3. Planning
 4. Regulatory Approaches
 5. Conservation Strategies

Christina Jennings

WORKING W/ MUNICIPAL OBSERVATION & POLICY

2010, Use Support Status for Aquatic Life

Groundwater and Environmental Protection Program

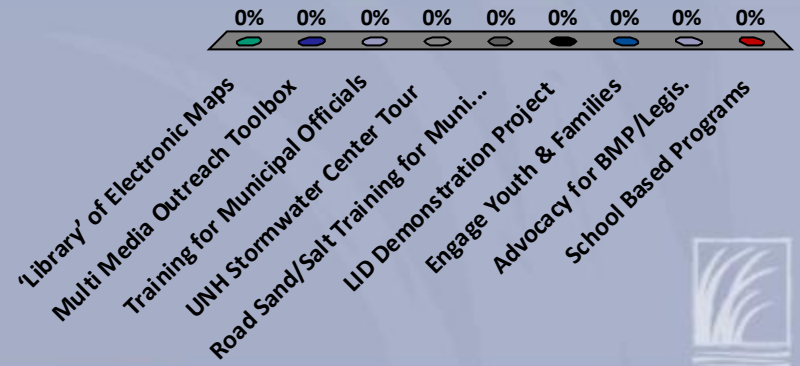

Working Water and Groundwater Services

Various informational posters and maps on the left side of the booth.

Evaluation of Ideas: Education & Outreach

Please Choose your #1 priority (Substance & Process)

1. 'Library' of Electronic Maps
2. Multi Media Outreach Toolbox
3. Training for Municipal Officials
4. UNH Stormwater Center Tour
5. Road Sand/Salt Training for Municipal Staff
6. LID Demonstration Project
7. Engage Youth & Families
8. Advocacy for BMP/Legis.
9. School Based Programs

Phase 4: Evaluate Stakeholder Input to Create the Action Plan

Following the Workshop the worksheets, flip charts and key pad poling results were evaluated to produce The Salmon Falls Watershed Collaborative Action Plan

Who will go to the Super Bowl this year?

1. The Giants
2. The Patriots
3. I am too busy watching Husky Basketball
4. I don't care

Water utility workers are Super Heros

1. Strongly Agree
2. Agree
3. Disagree
4. Strongly Disagree

Fostering *source water literacy* is an important objective for the CT SWC

1. Strongly Agree
2. Agree
3. Disagree
4. Strongly Disagree

Providing scientifically sound, place-based information on costs and benefits of source water protection is important

1. Strongly Agree
2. Agree
3. Disagree
4. Strongly Disagree

Protection of watershed protection fees on water bills would be well received in CT

1. Strongly Agree
2. Agree
3. Disagree
4. Strongly Disagree

Leveraging our collective efforts in SWP is an important objective for the CT SWC

1. Strongly Agree
2. Agree
3. Disagree
4. Strongly Disagree

Enforcing existing SWP policies & regulations is a statewide challenge that the CT SWC needs to consider

1. Strongly Agree
2. Agree

Challenges of Change

What kind of a change agent are you?

Secret Agent

Time Lord/Intellectual

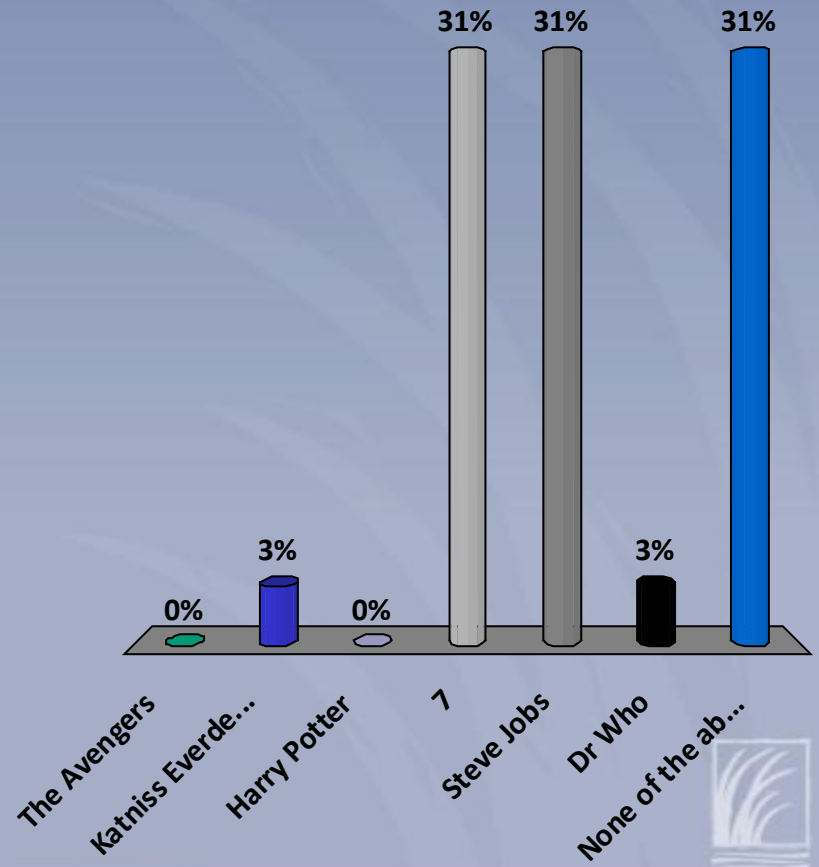

Innovator

My approach to being a change agent is most like:

1. The Avengers
2. Katniss Everdeen
3. Harry Potter
4. 007
5. Steve Jobs
6. Dr Who
7. None of the above

Elements of Diffusion

- The Innovation or Idea
- Communication pathways
- Time
- The social system within which the innovation or idea moves

The steps of diffusion

- Knowledge – Did you hear about...?
- Persuasion – Tell me more about ...
- Decision – I'd like to try...
- Implementation – Just do it!
- Confirmation –Keep doing it

Evaluating the Vision of a Source Water Collaborative for Connecticut

Imagine this change...

One of the ideas generated today has been implemented as you envisioned it would be.

“Do not try to satisfy your vanity by teaching a great many things. Awaken people's curiosity. It is enough to open minds; do not overload them. Put there just a spark. If there is some good inflammable stuff, it will catch fire.”

Rachel Carson
