Instructions for Computation of Use Tax

Purchases of gasoline, on which a motor vehicle fuels tax refund claim is allowed, are subject to Connecticut use tax at the use tax rate in effect at the time of the purchase. Use tax is calculated on the price paid per gallon less the Connecticut motor vehicle fuels tax rate. You must determine your Connecticut use tax liability on such purchases according to the following steps:

Step 1

Divide the total amount you paid (including all taxes and charges) to purchase the gasoline reported on Line 2 of this form by the total gallons reported on Line 2 of this form to compute your **average price per gallon** of fuel.

Step 2

Subtract the Connecticut motor vehicle fuels tax rate (25¢ (.25) per gallon) from your **average price per gallon** to compute your **net average price per gallon**.

Step 3

Multiply your **net average price per gallon** by the number of gallons entered on Line 6. Multiply that amount by the use tax rate of 6% (.06) to compute your **use tax due**. Enter the **use tax due** on Line 9.

Note: If you claim exemption from the Connecticut use tax because the fuel was used and consumed directly in manufacturing or commercial fishing, you must send the appropriate exemption certificate with each refund claim filed.
