## Summary of Research Unit Activities

Presented to:

**Criminal Justice Policy Advisory Commission**

**April 30, 2010**

# **CJPPD - Research Unit**

---

- **Hiring two new staff members has allowed the Research Unit to expand its work.**
- **Current on-going work:**
  - **Prison Population Forecast**
  - **Monthly Indicators Report**
  - **Recidivism**
    - **Recidivism analysis: 10,008 CT prisoners released in 2011**
    - **Report published on recidivism among prisoners released in 2008**
  - **The Walker Interview Project**
  - **The Mapping Initiative**
  - **Census Studies**
  - **Case Studies, and**
  - **Technical Assistance – the CRU Unit**

# 2015 Prison Population Forecast

	Avg. Daily Count	OPM 2015 Forecast	Inmate difference
JAN '15	16,204	-	-
FEB	16,302	16,343	41
MAR	16,124	16,136	12
APR	16,161	16,079	(82)
MAY	-	16,052	-
JUN	-	16,039	-
JUL	-	16,061	-
AUG	-	16,078	-
SEP	-	16,085	-
OCT	-	16,117	-
NOV	-	16,112	-
DEC	-	15,948	-
JAN '16	-	15,686	-
FEB	-	15,917	-

*Avg. Daily Count (ADC) for 1st week of month*

- **OPM projects moderate contraction in the size of the prison population over the coming year.**
- **If the forecast is accurate, the population will dip below 16,000 by December 1st.**
- **July 1998 was the last month in which the prison population was below 16,000.**

## OPM - Criminal Justice Policy & Planning Division

# Recidivism in CT, 2008 releases

### Highlights

- During 2008, 16,288 men and women were released or discharged from CT DOC custody. Within the next three years:
  - 64% had been re-arrested,
  - 54% had been readmitted to prison for at least one day,
  - 51% had been convicted for a new offense, and
  - 37% had been returned to prison to begin a new term of incarceration.
- Recidivism rates among ex-offenders have been relatively stable in recent years. Among offenders released or discharged in 2004, 2005 and 2008, about 37% were sentenced to new prison terms within 3 years.
- Most offenders who return to prison do not return for violent crimes. Approximately 50% of offenders, who were released from prison in 2008 and subsequently arrested and charged with a felony, within a year of release, were charged for drug offenses.
- The state lacks solid, empirical information on the circumstances of most offenders once they leave prison. As a result, state policymakers are unable to speak with certainty about the factors driving persistent recidivism rates in the state. Although significant resources are expended on re-entry, the failure to collect critical information on offenders once they leave prison makes it almost impossible to measure the quality and effectiveness of state-funded prisoner re-entry initiatives.

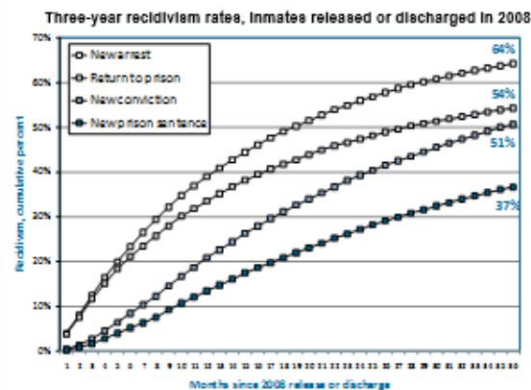

### How is recidivism measured?

The Criminal Justice Policy & Planning Division (CJPPD) at OPM regularly collects and analyzes criminal justice data on offenders in the state's prison system.

In this analysis, CJPPD has calculated three-year recidivism rates for 16,288 sentenced offenders who were released or discharged from DOC custody during 2008. The data was supplied by the Department of Correction (DOC) and the Judicial Branch's Court Support Services Division (CSSD). Four separate measures of recidivism are presented: 1) new arrests 2) any return to prison 3) new convictions, and 4) returns to prison to begin a new sentence.

	Time since 2008 release or discharge			
	Six months	One year	Two years	Three years
New arrest	23%	39%	56%	64%
Return to prison	21%	34%	47%	54%
New conviction	8%	21%	39%	51%
New sentence	5%	13%	27%	37%

In several respects, 2008 was a landmark year for criminal justice policy in Connecticut. In the aftermath of a brutal and sensational triple-murder in Cheshire, Governor Jodie Rell suspended parole releases in 2007. Within months, the prison count swelled by almost 1,000 inmates. By February 1, 2008, the prison population reached 19,894, its historic high. Later in the year, new legislation strengthened penalties for certain crimes, restructured the state's parole Board, and boosted investment in efforts to improve data gathering and information sharing among criminal justice agencies. For most of 2008, the DOC labored to house and process a backlog of offenders who in other circumstances would likely have been released to parole.

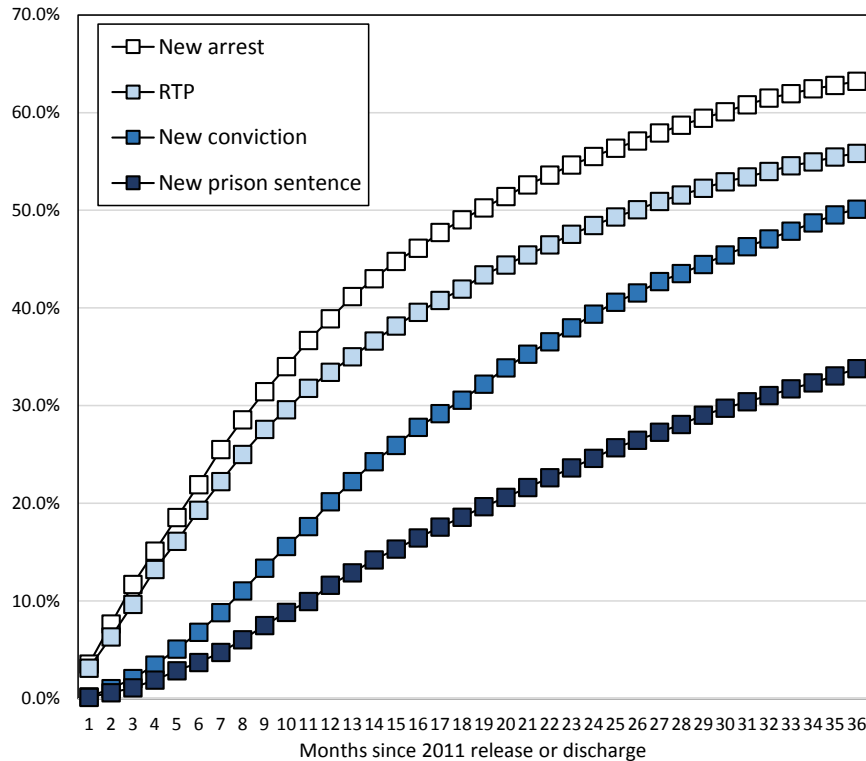

## Just released: Recidivism study – 2008 cohort

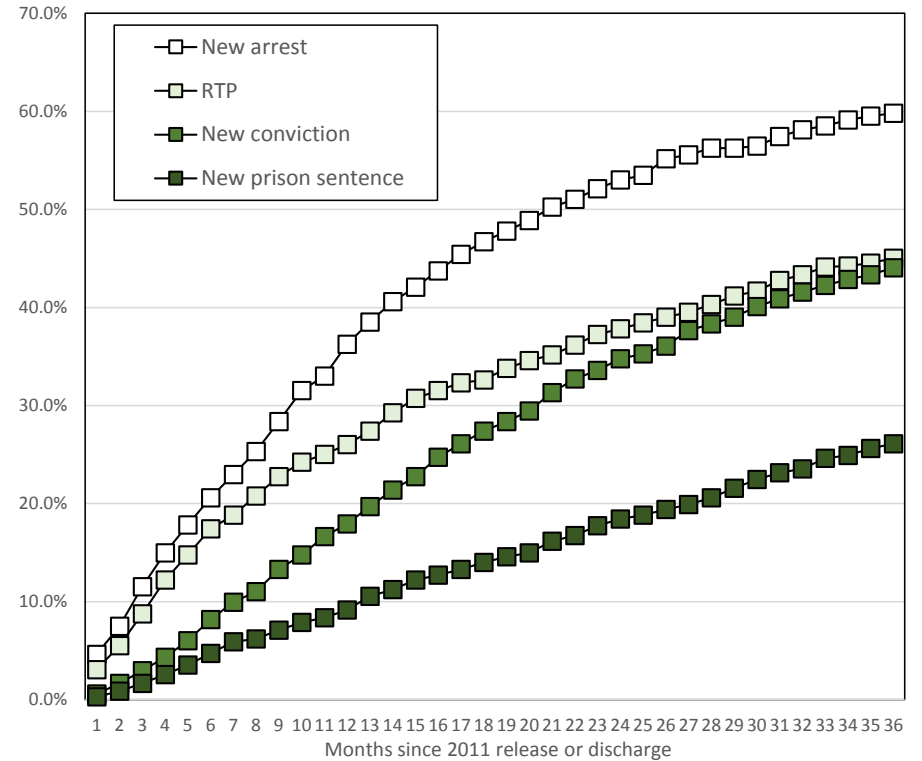

- Study tracks 16,000+ offenders who were released or discharged from DOC custody in 2008.
- Looks at recidivism by age, gender, risk profile and release status.
- Also looks at types of new criminal activity, institutional behavior prior to release and RREC.
- Most of the analysis was performed in 2013 and 2014. Findings were shared at various CJ venues.
- CJPPD is also preparing to release recidivism analysis of data for offenders release in 2011.
- The report is available on the OPM-CJPPD website:  
[http://www.ct.gov/opm/lib/opm/cjppd/cjsac/20150424recidivism\\_report\\_february\\_2015.pdf](http://www.ct.gov/opm/lib/opm/cjppd/cjsac/20150424recidivism_report_february_2015.pdf)

# Recidivism, 2011 cohort

Recidivism, 2011 release cohort, men

Recidivism, 2011 release cohort, women

Recidivism rates - 2011 cohort, 8,993 men

	New arrest	Return to prison	New conviction	New prison sentence
12 month rate	39%	33%	20%	12%
24 month rate	56%	48%	39%	25%
36 month rate	63%	56%	50%	34%

Recidivism rates - 2011 cohort, 1,015 women

	New arrest	Return to prison	New conviction	New prison sentence
12 month rate	36%	26%	18%	9%
24 month rate	53%	38%	35%	18%
36 month rate	60%	45%	44%	26%

# Recidivism, arrests – gender and age

New arrest rate, men released in 2011 by age quintile

New arrest rate, women released in 2011 by age quintile

Recidivism (new arrests) - 2011 cohort, 8,993 men

	All men	Under 25	25 to 30	31 to 37	38 to 45	Over 45
12 month rate	39%	50%	40%	37%	37%	30%
24 month rate	56%	68%	57%	55%	55%	44%
36 month rate	63%	76%	65%	63%	62%	51%

Recidivism (new arrests) - 2011 cohort, 1,015 women

	All women	Under 25	25 to 30	31 to 39	40 to 45	Over 45
12 month rate	36%	39%	37%	40%	33%	32%
24 month rate	53%	60%	52%	61%	50%	43%
36 month rate	60%	63%	61%	68%	57%	51%

# Recidivism, prison sentence – gender and age

New prison sentence, 2011 male cohort by age quintile

New prison sentence, 2011 female cohort by age quintile

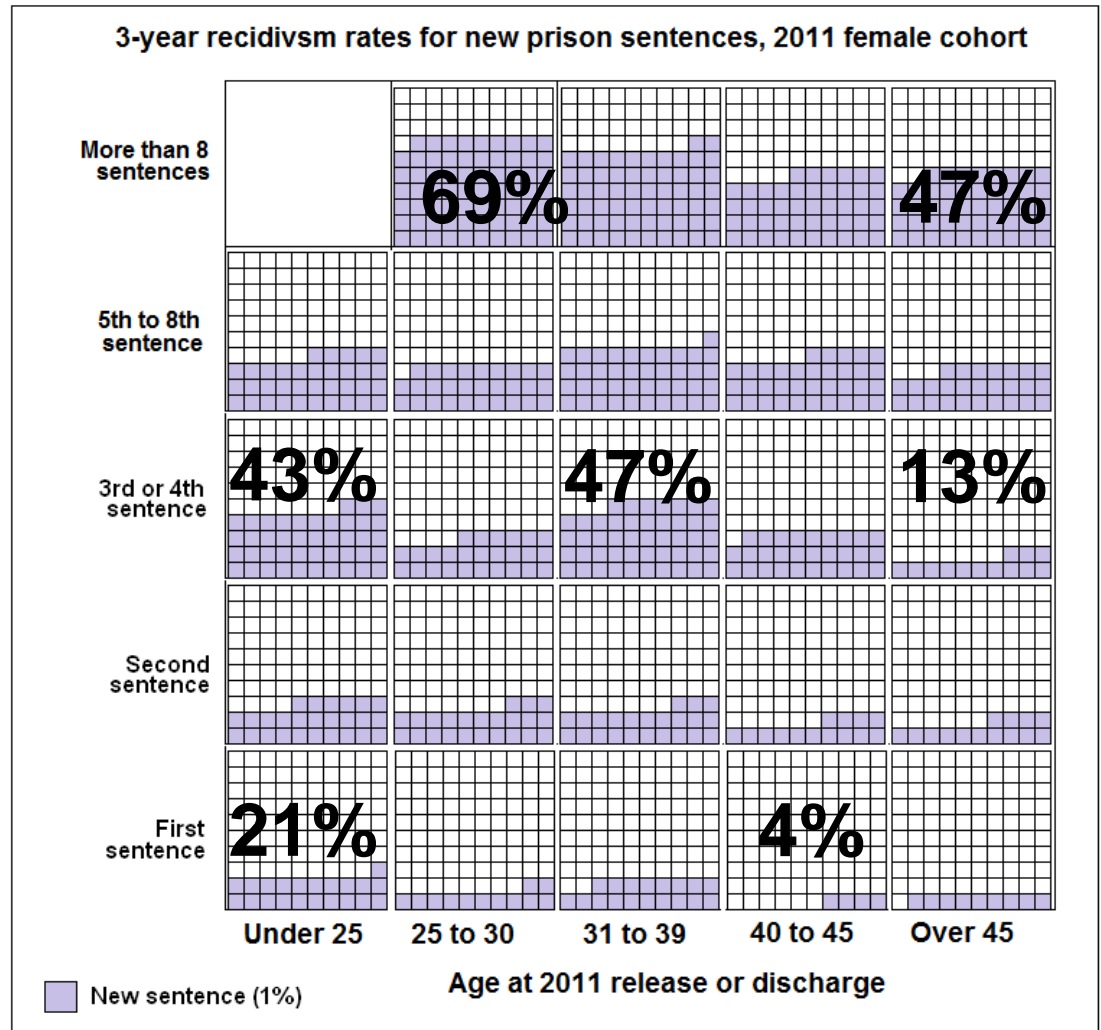

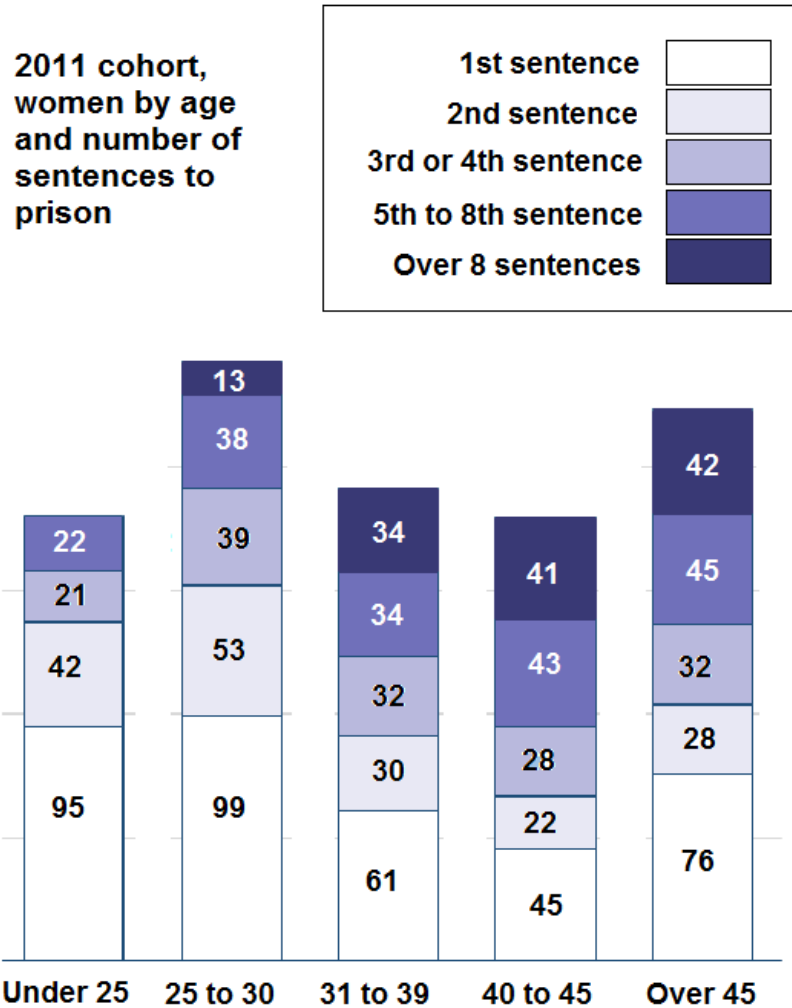

**Recidivism (new prison sentence) - 8,993 men**

	All men	Under 25	25 to 30	31 to 37	38 to 45	Over 45
12 month rate	12%	14%	10%	11%	12%	11%
24 month rate	25%	30%	24%	24%	25%	20%
36 month rate	34%	41%	34%	33%	34%	27%

**Recidivism (new prison sentence) - 1,015 women**

	All women	Under 25	25 to 30	31 to 37	38 to 45	Over 45
12 month rate	9%	9%	7%	12%	9%	9%
24 month rate	18%	19%	14%	26%	18%	17%
36 month rate	26%	27%	22%	36%	26%	21%

# 3-year recidivism – new prison sentence – women, age and the number of prison sentences prior to 2011 release

# 3-year recidivism – new prison sentence – men, age and the number of prison sentences prior to 2011 release

# The most accomplished recidivator in 2008

A 50-year old man was the most accomplished recidivator in the 8,993-man 2008 release cohort.

- First DOC admit: 1976 as an 18-year old pre-trial detainee
- Total number of DOC admits prior to 2008 release: 218
- Total number of sentenced to prison (dockets): 92
- Total number of charges on dockets: 114
  - 36 for breach of peace
  - 30 for disorderly conduct
  - 9 petty larcenies, and
  - 9 counts of criminal mischief.
- He served time for six felonies (assault on a police or fire officer (3), assault 2 (1), burglary 3 (1) and reckless burning (1).
- Longest prison sentence: 2 years
- DOC records indicate he had a serious substance abuse problem requiring intensive residential or out-patient treatment.
- Not surprisingly, this offender has returned to prison several times since 2008, all on misdemeanor charges.

# The Walker Project – 73 interview mark

- **Thanks to Commissioner Semple and his staff, CJPPD's research unit has had the ability to perform interviews with offenders at Walker CI.**
- **The intent is to collect information – at this central classification unit - on the circumstances of CT offenders before they enter/re-enter the prison system.**
- **Open-ended interviews explore childhood, families, violence, education, employment, criminality, incarceration and the legal system.**

# The Walker Project - Demographics

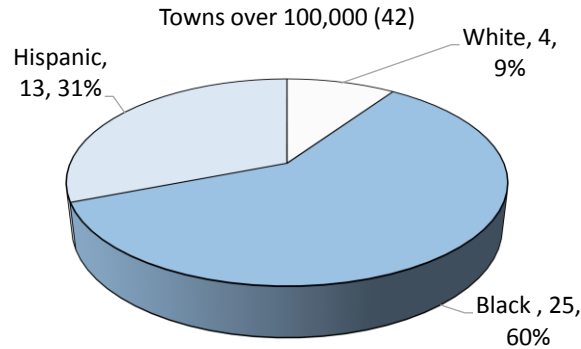

**A glaring racial and ethnic divide exists between the state's urban and suburban communities.**

- **85% of whites came from cities and towns of under 100,000 people**
- **80% of blacks and 73% Hispanics came from the state's five largest cities.**

- CT towns with population over 100,000: Bridgeport, Hartford, New Haven, Stamford & Waterbury
- Significant violence includes shooting, stabbing, robbery or other significant assault

# Most significant finding - victimized offenders?

	Shot?			Stabbed?			Victim of significant violence?			Family or friend, victims of violence			Incarcerated family members?		
	All	Urban	Non-urban	All	Urban	Non-urban	All	Urban	Non-urban	All	Urban	Non-urban	All	Urban	Non-urban
White	0	0	0	3	1	2	13	2	11	6	1	5	11	3	8
