

MacArthur Foundation Safety and Justice Challenge Proposal

Criminal Justice Policy Advisory Commission Thursday, January 28, 2016

MacArthur Foundation Goals

- Safely reduce the number of individuals held in jail
- Reduce the length of stay in jail detention
- Create reforms that eliminate racial disparities in the criminal justice system

The MacArthur Safety and Justice Challenge

Challenge: Achieve 18% reduction in jail population over a two

year period.

Requested: \$4 million in grant funds from the MacArthur Foundation

Six Month Planning Process:

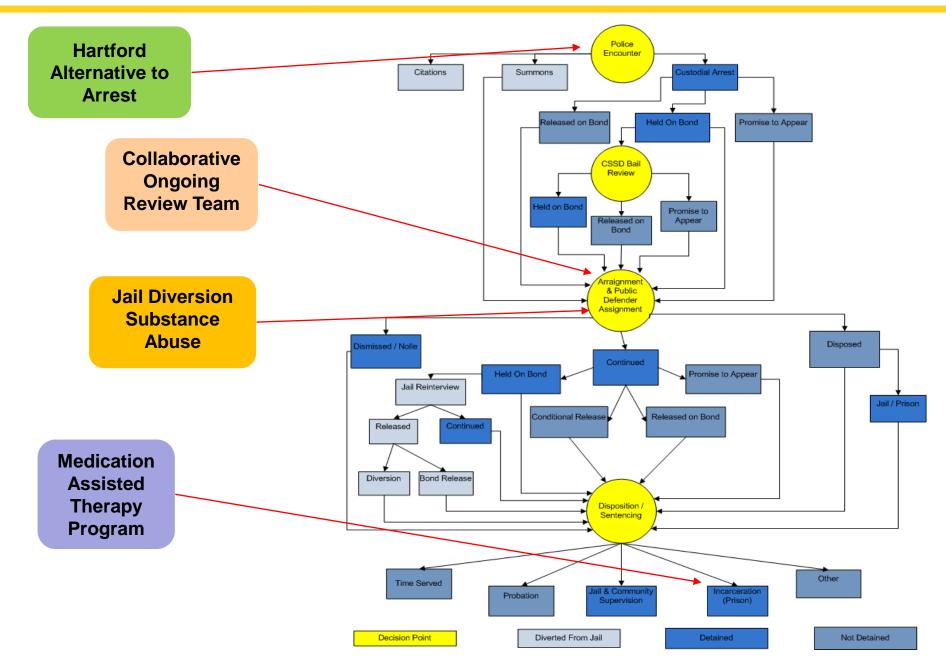

Develop a proposal that;

- Consists of pilot strategies and training and evaluation initiatives that address the major decision points leading to jail incarceration. (arrest, pre- arraignment, and post jail release)
- Include participation from multiple state and local agencies, law enforcement, and advocacy organization.

Project Partners

Proposed Pilot Strategies

Hartford Alternative to Arrest Project (HAAP)

Project Goal: For the Hartford Police Department to deflect low risk high

need offenders from custodial arrest into community based

mental health care, addiction treatment, and social services.

Pilot Location: Hartford neighborhoods of;

Barry Square

South Green

Frog Hollow

Summary:

Develop alternative to arrest policies and protocols

•Reduce custodial arrests in pilot neighborhoods for; drug offenses, prostitution, burglary, and larceny

Develop a referral system to mental health and substance abuse services.

Collaborative Ongoing Review Team (CORT)

Project Goal: To reduce the time in pre-trial detention through the

development of case processing improvements.

Pilot Location: New Haven and Bridgeport

Summary:

- Collaboration between the Division of Criminal Justice and Office of the Chief Public Defender
- Establish early and ongoing screening of cases for an alternative case processing stream
- Increase information sharing and use of alternative options to reduce collateral consequences.

Jail Diversion Substance Abuse Program (JDSA)

Project Goal: To increase access to court-based diversion programing, such

as substance abuse treatment services.

Pilot Location: New Haven

Summary:

- Expand DMHAS JDSA program to provide court-based diversion detox and residential treatment in the community.
- Reduce pre-trial jail detention and risk factors.

Medication Assisted Therapy (MAT)

Project Goal: Expand the Department of Correction's facility based

Medication Assisted Therapy program.

Location: Willard – Cybulski Correctional Institution

Summary:

- Program provides methadone induction to opiod addicted inmates 6-8 weeks prior to their release into the community.
- Provides community based treatment at post release.
- Helps support successful re-entry into the community and reduce risk of future re-arrest and re-incarceration.

Proposed Training Initiatives and Evaluation

Goal: To develop specialized training components to serve as a foundation for the Safety and Justice Challenge proposed pilot strategies.

Cross Agency Training and Systems Improvement

 Develop cross-agency training for criminal justice professionals and local stakeholders to increase awareness of existing deflection and pre-trial diversion interventions and services.

Implicit Bias Training

 Expand implicit bias training for criminal justice professionals and local stakeholders in Hartford, Bridgeport, and New Haven.

Assessment of Racial Disparities

 Conduct a data based analysis of racial disparities at key decision points within the criminal justice system.

Project Next Steps

- The MacArthur Foundation is currently reviewing Connecticut's final proposal.
- On April 13th 2016 the Safety and Justice Challenge winners will be announced.
- In preparation for the announcement the Safety and Justice Challenge work group will continue to;
 - Take a deeper dive into data analysis
 - Continue to develop implementation specifics for each strategy
