The experience and dedication you deserve
November 3, 2010

Board of Trustees<br>Connecticut State Teachers' Retirement System<br>765 Asylum Avenue<br>Hartford, CT 06105<br>Members of the Board:

The laws governing the operation of the Connecticut State Teachers' Retirement System provide that actuarial valuations of the assets and liabilities of the System shall be made at least once every two years. We have conducted the biennial actuarial valuation of the System as of June 30, 2010 and the results of the valuation are contained in the following report.

In performing the valuation, we relied on data supplied by the System and performed limited tests on the data for consistency and reasonableness. The valuation was prepared in accordance with the funding objectives of the System as set forth in Chapter 167a, Section 10-183z of the Connecticut General Statutes. The normal cost and accrued liability of the System are developed using the entry age normal cost method. Under this method, the normal cost is the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

In determining the System's liabilities, future events, such as investment returns, salary increases, deaths, retirements, etc., are anticipated based upon the set of actuarial assumptions as approved by the Board. The assets of the system for valuation purposes are developed using an asset smoothing technique which spreads the recognition of the unexpected portion market related gains and losses over a period of years with the goal of dampening the impact of market volatility upon valuation results.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The accrued liability contribution was determined in accordance with subsections (b) and (c) of Section 10-183z of the Statutes. In our opinion, the System continues to operate on an actuarially sound basis.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions and methods that are internally consistent and reasonably based on the actual experience of the System.

Respectfully submitted,

John J. Garrett, ASA, FCA, MAAA
Principal and Consulting Actuary

Cathy Turcot
Principal and Managing Director

## Section I: Board Summary

The table below summarizes the results of the June 30, 2010 actuarial valuation as compared with the prior year.

| Table I-1: Comparative Summary of Principal Results |  |
| :--- | :--- |
| Membership | June 30, 2008 | June 30, 2010

## Section I: Board Summary

## Summary of Key Findings

The employer contribution rate for the System is used to pay the employer's portion of the normal cost and to amortize the unfunded actuarial accrued liability (UAAL).

The actuarially determined employer normal cost contribution rate decreased from $10.40 \%$ as of June 30, 2008 to $10.11 \%$ as of June 30, 2010. The unfunded actuarial accrued liability increased from $\$ 6.530$ billion to $\$ 9.066$ billion over the two year period. The unfunded actuarial accrued liability rate increased from $10.81 \%$ to $15.09 \%$. We note the following key findings:

- The UAAL grew by $\$ 1.189$ billion due to interest and decreased by $\$ 834.8$ million due to the amortization payments over the two year period.
- The System experienced actuarial losses on plan assets of $\$ 1.054$ billion for fiscal year 2009 and $\$ 1.069$ billion for fiscal year 2010 as a result of the investment return on the actuarial value of assets being less than the assumed rate. Table III-3 provides the calculation of the investment losses for the two- year period.
- The System experienced a net actuarial loss of $\$ 198.0$ million as of June 30, 2009 and a net actuarial gain of $\$ 139.7$ million as of June 302010 on plan liabilities due to non-investment related experience. Table IV-2 provides the reconciliation of the UAAL which is summarized as follows:

1. There was an increase in the UAAL of $\$ 163.4$ million due to the transition from the prior actuarial firm. This is primarily due to a difference in the allocation of liabilities between normal cost and accrued liability.
2. The System provides post-retirement Cost-of-Living Adjustments based upon certain criteria set forth in the statutes. For purposes of the valuation, the benefits paid to eligible retirees and beneficiaries are expected to increase at a rate of $3.00 \%$ annually for members retired before September 1992 and $2.0 \%$ for members retired on and after September 1, 1992. The actual COLAs granted for members retired on and after September 1, 1992 were $1.5 \%$ for 2009 and there was no COLA granted for 2010. This resulted in a $\$ 46.4$ million gain to the System in 2009 and $\$ 190.2$ million gain to the system in 2010.

## Section I: Board Summary

3. The System experienced a $\$ 24.9$ million loss due to salary experience for 2009 and a $\$ 42.1$ million gain due to salary experience for 2010.
4. In addition, there were other losses primarily attributable to the System turnover experience. The loss for 2009 was $\$ 56.1$ million and the loss for 2010 increased plan liabilities by $\$ 92.5$ million.

Section II of the report provides summarized information on the membership data used in the valuation. Section III of the report covers the System's assets and Section IV of the report covers the System's liabilities. The results of the valuation are provided in Section V of the report and the accounting information is in Section VI. The appendices provide additional information on: A) the System members; B) the actuarial assumptions and methods; and C) the summary of plan provisions. In addition, Appendix D provides a glossary of actuarial terminology. It should be noted that all information contained in this report for periods prior to June 30, 2009 was produced by a prior actuarial consulting firm.

## Section II: Membership Data

Data regarding the membership of the System for use in the valuation were furnished by the Retirement Systems. The following table summarizes the membership data as of June 30, 2010 and is compared with that reported for the prior valuation.

| Table II-1: Summary of Membership Data |  |  |
| :---: | :---: | :---: |
|  | June 30, 2008 | June 30, 2010 |
| Active Members |  |  |
| Total Number of Active Members | 51,738 | 51,368 |
| Total Annual Compensation | \$3,399,305 | \$3,645,974 |
| Retirees and Beneficiaries |  |  |
| Number of Service Retirements | 28,475 | 28,616 |
| Total Annual Benefit Payments | \$1,222,866 | \$1,317,047 |
| Number of Disability Retirements | 312 | 274 |
| Total Annual Benefit Payments | \$8,203 | \$6,979 |
| Number of Beneficiaries | * | 1,603 |
| Total Annual Benefit Payments | * | \$40,663 |
| Inactive Members |  |  |
| Number of Non-vested Inactive Members | 10,597 | 11,315 |
| Number of Vested Inactive Members | 1,394 | 1,315 |

| All\|| dollar amounts are in thousands. |  |  |

## Development of Actuarial Value of Assets

The Actuarial Value of Assets represents a "smoothed" value developed with the purpose to dampen the impact of market volatility on the assets used in determining valuation results. The Actuarial Value of Assets has been calculated by spreading the recognition of excess investment income over four years. The amount of excess investment income in each year is the difference between expected investment income on actuarial value and the actual market value investment income. Table III-2 provides the development of the actuarial value of assets over the two year period since the previous valuation.

| Table III-2: Development of Actuarial Value of Assets |  |  |
| :---: | :---: | :---: |
|  | June 30, 2009 | June 30, 2010 |
| 1. Actuarial Value Beginning of Year | \$15,271,013 | \$14,875,428 |
| 2. Market Value End of Year | 11,397,053 | 12,273,604 |
| 3. Market Value Beginning of Year | 14,551,467 | 11,397,053 |
| 4. Cash Flow |  |  |
| a. Contributions | 782,427 | 813,278 |
| b. Disbursements | $(1,395,821)$ | $(1,428,286)$ |
| c. Net: $4 \mathrm{a}+4 \mathrm{~b}$ | $(613,393)$ | $(615,008)$ |
| 5. Investment Income |  |  |
| a. Market Total: $2-3-4 \mathrm{c}$ | (2,541, 021) | 1,491,559 |
| b. Assumed Rate of Return | 8.50\% | 8.50\% |
| c. Amount for Immediate Recognition: $(1 \times 5 b)+(4 c \times 5 b \times 0.5)$ | 1,271,967 | 1,238,274 |
| d. Amount for Phased-In Recognition: $5 \mathrm{a}-5 \mathrm{c}$ | $(3,812,988)$ | 253,286 |
| 6. Phased-In Recognition of Investment Income |  |  |
| a. Current Year: 5d * 25 | $(953,247)$ | 63,321 |
| b. First Prior Year | $(440,053)$ | $(953,247)$ |
| c. Second Prior Year | 261,472 | $(440,053)$ |
| d. Third Prior Year | 77,670 | 261,472 |
| e. Total Recognized Investment Gain | $(1,054,158)$ | $(1,068,506)$ |
| 7. Total Recognized Investment Return: $5 \mathrm{c}+6 \mathrm{e}$ | 217,809 | 169,767 |
| 8. Actuarial Value End of Year: $1+4 \mathrm{c}+7$ | 14,875,428 | 14,430,187 |
| 9. Difference Between Market \& Actuarial Values: $2-8$ | $(3,478,375)$ | $(2,156,583)$ |
| 10. Rate of Return on Actuarial Value | 1.46\% | 1.17\% |
| All dollar amounts are in thousands. |  |  |

## Section III: System Assets

The actuarial valuation assumes the investment income on the assets of the System is $8.50 \%$ annually. This assumption is based upon the reasonable long-term expected return on the assets. In each year, the System will experience actuarial gains and losses due to the actual investment return of the assets.

## Section IV: System Liabilities

The present value of benefits is the value as of the valuation date of all future benefits expected to be paid to current members of the System. An actuarial cost method allocates each individual's present value of benefits to past and future years of service. The actuarial accrued liability includes the portion of the active member present value of benefits allocated to past service as well as the entire present value of benefits for retirees, beneficiaries and inactive members. The unfunded actuarial accrued liability (UAAL) is the difference between the actuarial accrued liability and the actuarial value of assets. Table IV-1 shows the allocation of the present value of future benefits into components for future normal cost contributions and actuarial accrued liabilities and the determination of the UAAL as of the valuation date.

|  |  | Entry Age Actuarial Cost Method |  |
| :---: | :---: | :---: | :---: |
|  | (1) <br> Present Value of Future Benefits | (2) <br> Portion <br> Covered By <br> Future Normal <br> Cost Contributions | (3) <br> Actuarial Accrued Liabilities (1) - (2) |
| Active Members |  |  |  |
| Service Retirement | \$12,195,453 | \$2,849,031 | \$9,346,422 |
| Disability Retirement | 154,813 | 106,593 | 48,220 |
| Survivors' Benefits | 184,527 | 56,469 | 128,058 |
| Termination | 483,403 | 450,535 | 32,868 |
| Total for Active Members | 13,018,196 | 3,462,628 | 9,555,568 |
| Inactive Members |  |  |  |
| Non-Vested (Refund only) | 200,781 | 0 | 200,781 |
| Vested | 155,203 | 0 | 155,203 |
| Total for Inactive Members | 355,985 | 0 | 355,985 |
| Retirees and Beneficiaries |  |  |  |
| Service Retirements | 13,146,159 | 0 | 13,146,159 |
| Disability Retirements | 75,078 | 0 | 75,078 |
| Beneficiaries | 363,127 | 0 | 363,127 |
| Total for Retirees and Beneficiaries | 13,584,363 | 0 | 13,584,363 |
| Total | \$26,958,544 | \$3,462,628 | \$23,495,916 |
| Actuarial Value of Assets |  |  | \$14,430,187 |
| Unfunded Actuarial Accrued Liability |  |  | \$9,065,729 |
| Funded Ratio |  |  | 61.42\% |
| All dollar amounts are in thousands. |  |  |  |

The funded ratio of the System is the ratio of the actuarial value of assets divided by the actuarial accrued liability as of the valuation date. As of June 30, 2010, the funded ratio of the System is 61.42\% as compared to the ratio in the prior valuation of $70.05 \%$. The decline in the funded ratio is primarily attributable to the investment experience during the past two years. The ratio is a commonly used measure of the funding progress of a System and can be useful in reviewing the historical trend of a System's funding progress. Such a review should also consider the impact to this measure over the historical period due to changes to plan benefits, changes to the actuarial assumptions and methods, and the significant impact that investment experience can have on the ratio over short-term periods. We caution that no single "point in time" measure can provide a universal basis for comparing one System to another.

Although the terminology used to describe the excess of the System's actuarial accrued liability over the System's actuarial value of assets is called the "unfunded" actuarial accrued liability, there is a dedicated source of funding for this liability. The scheduled employer and employee contributions are expected to completely fund the System's liabilities (pay off the UAAL) based on statutory funding requirements.

The calculation of the System's actuarial assets and liabilities require the use of several assumptions concerning the future experience of the System and its members. In each valuation, the latest year of actual experience is compared to that expected by the prior valuation. The differences are actuarial gains and losses which decrease or increase the UAAL. Table IV-2 provides for the reconciliation of the UAAL and shows the primary sources of this year's gains and losses due to actuarial experience.

## Table IV-2: Reconciliation of the UAAL

1. UAAL as of June 30, 2008
2. Expected Amortization Payment $(437,301)$
3. Expected Interest $(1 \times 8.50 \%+2 \times 8.50 \% \times .5)$ 536,465
4. Expected End of Year UAAL $(1+2+3)$ \$6,629,172
5. Actuarial Experience (Gain)/Loss
Change due to Transition \$163,398
COLA
$(46,435)$
Salary Experience 24,948
Turnover and Other
56,129
Asset Experience $\quad \underline{1,054,158}$
Total Actuarial (Gain)/Loss \$1,252,198
6. UAAL as of June 30, $2009(4+5)$
\$7,881,370
7. Expected Amortization Payment $(397,450)$
8. Expected Interest $(6 \times 8.50 \%+7 \times 8.50 \% \times .5)$
653,025
9. Expected End of Year UAAL $(6+7+8) \quad \$ 8,136,945$
10. Actuarial Experience (Gain)/Loss
COLA
$(190,164)$
Salary Experience
$(42,096)$
Turnover and Other
92,538
Asset Experience $\quad 1,068,506$
Total Actuarial (Gain)/Loss \$928,784
11. UAAL as of June 30, $2010(8+10) \quad \$ 9,065,729$

All dollar amounts are in thousands.

## Section V: Actuarial Valuation Results

Section IV of this report presented the System's total present value of future benefits allocated between the present value of future normal cost contributions and actuarial accrued liability. The portion of the active members' present value of benefits allocated to future years of service is funded through annual normal cost contributions comprised of both active member and employer contributions. The System's annual normal cost rate is calculated as a percent of covered payroll which is expected to remain level over all future years of service. The portion of the total normal cost rate in excess of the active member contribution rate is the state normal cost rate. The normal cost rate developed as of the valuation date is presented in Table V -1. Table $\mathrm{V}-1$ also shows the state contribution rates necessary to amortize the UAAL in accordance with the funding requirements in the statutes.

| Table V-1: State Contribution Rate |  |
| :--- | ---: |
| Normal Cost Rate of Active Members by Expected Benefit Type |  |
| Service Retirement | $8.32 \%$ |
| Termination | $1.30 \%$ |
| Disability Retirement | $0.32 \%$ |
| Survivors' Benefits | $0.17 \%$ |
| Total Normal Cost Rate for Active Members | $10.11 \%$ |
| Less: Active Member Contribution Rate | $6.00 \%$ |
|  |  |
|  | $4.11 \%$ |
| Unfunded Actuarial Accrued Liabilities |  |
| Plan in effect 6/30/1991 (21 years) | $17.87 \%$ |
| Public Act 82-91 (2 years) | $0.14 \%$ |
| Public Act 87-381 (7 years) | $0.01 \%$ |
| Public Act $92-205$ (12 years) | $(4.86) \%$ |
| Public Act 98-251 (17 years) | $0.02 \%$ |
| Public Act 07-186 (27 years) | $1.91 \%$ |
| Total | $15.09 \%$ |
| State Contribution Rate | $19.20 \%$ |

## Section VI: Accounting Statement Information

1. Governmental Accounting Standards Board Statements 25 and 27 set forth certain items of required supplementary information to be disclosed in the financial statements of the System and the employer. One such item is a distribution of the number of employees by type of membership, as follows:

| Table VI-1: Number of Active and Retired <br> Members as of June 30, 2010 |  |
| :--- | ---: |
| Retired members and beneficiaries |  |
| currently receiving benefits |  |
|  |  |
| Vested inactive members | 30,493 |
| Non-Vested inactive members | 1,315 |
| Active members | 11,315 |
| Total | $\underline{51,368}$ |

2. Another such item is the schedule of funding progress as shown below

Table VI-2: Schedule of Funding Progress

| Actuarial Valuation as of June 30 | Actuarial Value of Assets (a) | Actuarial Accrued Liability (AAL) ( b ) | Unfunded <br> AAL (UAAL) <br> (b) - (a) | Funded Ratio <br> (a)/(b) | Covered Payroll ( c ) | UAAL as a \% of Active Member Payroll $[(\mathrm{b})-(\mathrm{a})] /(\mathrm{c})$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1996 | \$6,648.2 | \$9,626.8 | 2,978.6 | 69.1\% | 2,151.6 | 138.4\% |
| 1998 | 7,721.1 | 10,970.1 | 3,249.0 | 70.4\% | 2,298.9 | 141.3\% |
| 2000 | 9,605.9 | 11,797.6 | 2,191.7 | 81.4\% | 2,501.5 | 87.6\% |
| 2002 | 10,387.3 | 13,679.9 | 3,292.6 | 75.9\% | 2,698.3 | 122.0\% |
| 2004 | 9,846.7 | 15,070.5 | 5,223.8 | 65.3\% | 2,930.8 | 178.2\% |
| 2006 | 10,190.3 | 17,112.8 | 6,922.5 | 59.5\% | 3,137.7 | 220.6\% |
| 2008 | 15,271.0 | 21,801.0 | 6,530.0 | 70.0\% | 3,399.3 | 192.1\% |
| 2010 | 14,430.2 | 23,495.9 | 9,065.7 | 61.4\% | 3,646.0 | 248.6\% |

All figures prior to 6/30/2010 were reported by the prior actuarial firm.

## Section VI: Accounting Statement Information

3. The following shows the schedule of employer contributions (all dollar amounts are in thousands).

|  | Table VI-3: Schedule of Employer Contributions |  |  |
| :---: | :---: | :---: | :---: |
| Fiscal Year Ending | Annual Required |  |  |
| June 30 | Contribution | Actual Contributions | Contributed |
| 2001 | $\$ 252,547,880$ | $\$ 214,665,698$ | $85.0 \%$ |
| 2002 | $210,701,421$ | $204,511,460$ | $97.1 \%$ |
| 2003 | $221,236,492$ | $179,823,603$ | $81.3 \%$ |
| 2004 | $270,544,487$ | $185,348,144$ | $68.5 \%$ |
| 2005 | $281,366,266$ | $185,348,143$ | $65.9 \%$ |
| 2006 | $396,248,625$ | $396,248,844$ | $100.0 \%$ |
| 2007 | $425,285,724$ | $412,101,958$ | $96.9 \%$ |
| 2008 | $518,560,263$ | $2,518,560,263$ | $485.7 \%$ |
| 2009 | $539,302,674$ | $539,302,674$ | $100.0 \%$ |
| 2010 | $559,224,245$ | $559,224,244$ | $100.0 \%$ |

For fiscal year ending June 30, 2008, bond proceeds amounting to $\$ 2$ billion were deposited into the fund, in addition to the normal State contribution.

## Section VI: Accounting Statement Information

4. The information presented in the required supplementary schedules was determined as part of the actuarial valuation at June 30, 2010. Additional information as of the latest actuarial valuation follows.

| Table VI-4: Additional Information |  |
| :---: | :---: |
| Valuation date | 6/30/2010 |
| Actuarial cost method | Entry Age |
| Amortization period | Level percent closed |

## Appendix B: Actuarial Assumptions and Methods

c. Table below provides a summary of the assumed rates of withdrawal for active members prior to eligibility for retirement.

| Annual Rates of Withdrawal |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 10 or more years of service |  |  |  |  |
| Years of Service | Male | Female | Age | Male | Female |
| $0-1$ | 0.140 | 0.120 | 25 | 0.0120 | 0.0350 |
| $1-2$ | 0.085 | 0.090 | 30 | 0.0120 | 0.0350 |
| $2-3$ | 0.055 | 0.070 | 35 | 0.0120 | 0.0350 |
| $3-4$ | 0.045 | 0.060 | 40 | 0.0120 | 0.0230 |
| $4-5$ | 0.035 | 0.055 | 45 | 0.0126 | 0.0130 |
| $5-6$ | 0.025 | 0.050 | 50 | 0.0196 | 0.0125 |
| $6-7$ | 0.024 | 0.045 | 55 | 0.0336 | 0.0160 |
| $7-8$ | 0.023 | 0.035 | 60 | 0.0400 | 0.0190 |
| $8-9$ | 0.022 | 0.030 |  |  |  |
| $9-10$ | 0.021 | 0.025 |  |  |  |

## Post-Retirement Mortality

For healthy retirees and beneficiaries, the RP-2000 Combined Mortality Table projected forward 19 years using scale AA, with a two-year setback for males and females. A separate table of mortality rates is used for disabled retirees. The following are sample rates for the retirees and beneficiaries:

| Annual Rates of Death |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Healthy |  |  | Disabled |  |
| Age | Male | Female | Male | Female |
| 50 | 0.1369\% | 0.1015\% | 0.3881\% | 0.3567\% |
| 55 | 0.1986\% | 0.1755\% | 0.7659\% | 0.6953\% |
| 60 | 0.3881\% | 0.3567\% | 1.3671\% | 1.2224\% |
| 65 | 0.7659\% | 0.6953\% | 2.2802\% | 2.0100\% |
| 70 | 1.3671\% | 1.2224\% | 4.1439\% | 3.2898\% |
| 75 | 2.2802\% | 2.0100\% | 7.7020\% | 5.4696\% |
| 80 | 4.1439\% | 3.2898\% | 13.6910\% | 9.9435\% |
| 85 | 7.7020\% | 5.4696\% | 22.0697\% | 16.4072\% |

## Marriage Assumption

$85 \%$ of males and $75 \%$ of females assumed to be married, with female spouses being 3 years younger than males.

## Asset Valuation Method

The actuarial value of assets recognizes a portion of the difference between the actual market value of assets and the expected actuarial value of assets, based on the assumed rate of investment return. The amount recognized each year is $25 \%$ of the difference between market value and expected actuarial value.

## Appendix B: Actuarial Assumptions and Methods

## Actuarial Cost Method

The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

The unfunded accrued liability is determined by subtracting the actuarial value of assets from the actuarial accrued liability.

## Future Cost-of-living Increases

Members who retired prior to September 1, 1992 are assumed to receive an annual Cost-of-Living Adjustment (COLA) of 3.0\%. Members who retired on or after September 1, 1992 are assumed to receive an annual Cost-of-Living Adjustment (COLA) of 2.0\%.

## Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

## Payroll Growth Rate

The total annual payroll of active members is assumed to increase at an annual rate of $4.00 \%$. This rate does not anticipate increases in the number of members.

## Changes from Prior Valuation

None.

Outlined below are the principal provisions of the system which were reflected in the results shown in this report.

## Covered Employees

Any teacher, principal, superintendent or supervisor engaged in service of public schools, plus professional employees at State schools of higher education if they choose to be covered.

## Annual Salary

Annual Salary rate for service as a Connecticut teacher during a school year excluding amounts paid for extra duty assignments, coaching, unused sick time, unused vacation or terminal pay.

## Average Annual Salary

Average of Annual Salary received during three years of highest salary.

## Credited Service

One month for each month of service as a teacher in Connecticut public schools, maximum 10 months for each school year. Ten months of credited service constitutes one year of Credited Service. Certain other types of teaching service, State employment, or war-time military service may be purchased at retirement, if the Member pays one-half the cost.

## Normal Retirement

Eligibility - Age 60 with 20 years of Credited Service in Connecticut, or 35 years of Credited Service including at least 25 years of service in Connecticut.

Benefit - 2\% of Average Annual Salary times years of Credited Service (maximum benefit is 75\% of Average Annual Salary)

In addition, amounts derived from the accumulation of $6^{\text {th }}$ percent contributions made prior to July 1, 1989 and voluntary contributions by the teacher are payable.

Minimum Benefit: Effective January 1, 1999, Public Act $98-251$ provides a minimum monthly retirement benefit of $\$ 1,200$ to teachers who retire under the Normal Retirement provisions and who have completed at least 25 years of full time Connecticut service at retirement.

## Early Retirement

Eligibility - 25 years of Credited Service including 20 years of Connecticut service, or age 55 with 20 years of Credited Service including 15 years of Connecticut service, with the last 5 years in Connecticut.

Benefit - Reduced normal retirement benefit. The early retirement factors currently in effect are $6 \%$ per year for the first five years by which early retirement precedes the minimum normal retirement age and 4\% per year for the next five years by which early retirement precedes the minimum normal retirement age. Effective July 1, 1999, the reduction for individuals with 30 or more years of service is $3 \%$ for each year by which early retirement precedes the minimum retirement age.

## Proratable Retirement

Eligibility - Age 60 with 10 years of Credited Service, with the last 5 years in Connecticut.
Benefit - $2 \%$ less $0.1 \%$ for each year less than 20 years of Average Annual Salary times years of Credited Service in Connecticut, plus 1\% of Average Annual Salary times years of additional Credited Service time.

## Disability Retirement

Eligibility - 5 years of Credited Service in Connecticut if not incurred in the performance of duty and no service requirement if incurred in the performance of duty.

Benefit - 2\% of Average Annual Salary times Credited Service to date of disability, but not less than 15\% of Average Annual Salary, nor more than 50\% of Average Annual Salary. In addition, disability benefit under this plan (without regard to any cost-of-living adjustments) plus any initial award of Social Security benefits and workers' compensation cannot exceed Average Annual Salary.

## Termination of Employment

Less than 5 years of Credited Service - Return 6\% contributions with interest.
5 or more years of Credited Service - Return 6\% contributions with interest and $1 \%$ contributions made prior to July 1, 1989 without interest.

10 or more years of Credited Service - Member is $100 \%$ vested in the accrued benefit based on Credited Service and Average Annual Salary as of the date of termination of covered employment. Benefits are payable at age 60 and early retirement reductions are based on the number of years service the member would have had if they had continued to work until age 60.

Member may elect return of all contributions plus interest on 6\% contributions in lieu of vested benefit.

## Pre-Retirement Death Benefits

A lump sum plus one of the following: survivor's benefit, return of all contributions with interest, or surviving spouse's benefit.

- Lump Sum: $\$ 1,000$ for the first 5 years of Connecticut service plus $\$ 200$ per year thereafter. Maximum benefit: $\$ 2,000$.
- Survivor's Benefit: For active teachers who die while in service, the family maximum benefit payable to survivors is $\$ 1,500$ per month. Each minor child is entitled to $\$ 300$ per month. The surviving spouse's benefit is $\$ 300$ per month if the member has 12 or less years of service. For each additional year of service, the surviving spouse's monthly benefit is increased $\$ 25$, up to a maximum of $\$ 600$.
- Accumulated contributions with interest plus dependent children's benefits as described in the "Survivor's Benefit" paragraph.
- $\quad$ Surviving Spouse's Benefit: An active member who is eligible for immediate retirement and who has named his or her spouse as primary beneficiary will be covered by a $100 \%$ Plan D co-participant option in the event of his or her death prior to retirement.

## Appendix C: Summary of Plan Provisions

## Benefit Options

Normal form: Partial Refund Option - $75 \%$ of total benefit is paid as a life annuity. If $25 \%$ of the benefits paid prior to death do not exceed the Member's 6\% contributions plus interest frozen at the date of the benefit commencement, the difference is paid to the Member's beneficiary.

Optional Forms: 5-, 10-, 20-, or 25-year certain and life and $33-1 / 3 \%, 50 \%, 66-2 / 3 \%, 75 \%$, or $100 \%$ co-participant annuity (if co-participant dies first, benefit reverts to unreduced amount).

Amounts payable under the optional forms are determined on an actuarially equivalent basis. Actuarial equivalence is determined using mortality as described in Section $F$ of the report, 8.5\% interest, and $2 \%$ compound COLA. A unisex mortality blend of $60 \%$ male was used for certain benefit forms, and a blend of $80 \%$ male was used for co-participant annuity forms.

## Cost-of-Living Allowance

For teachers who retired prior to September 1, 1992, pension benefit adjustments are made in accordance with increases in the Consumer Price Index, with a minimum of $3 \%$ and a maximum of $5 \%$ per annum.

For teachers who were members of the Teachers' Retirement System before July 1, 2007, and retire on or after September 1, 1992, pension benefit adjustments are made that are consistent with those provided for Social Security benefits on January 1 of the year granted, with a maximum of $6 \%$ per annum. If the return on assets in the previous year was less than $8.5 \%$, the maximum increase is $1.5 \%$.

For teachers who were members of the Teachers' Retirement System after July 1, 2007, pension benefit adjustments are made that are consistent with those provided for Social Security benefits on January 1 of the year granted, with a maximum of $5 \%$ per annum. If the return on assets in the previous year was less than $11.5 \%$, the maximum increase is $3 \%$, and if the return on the assets in the previous year was less than $8.5 \%$, the maximum increase is $1.0 \%$

## Teachers' Required Contribution

Effective July 1, 1992, each teacher is required to contribute $6 \%$ of annual salary for the pension benefit.

## State Contribution

The State's contribution requirement is determined in accordance with Section 10-183z (which reflects Public Act 79-436 as amended).

## Early Retirement Incentive

A local or regional board of education may establish a retirement incentive plan. The plan shall provided for purchase of additional credited service by a board of education and a member of the system who chooses to participate in the plan, of additional credited service for such member and for payment by the board of education of not less than fifty per cent of the entire cost of such total cost. Any such plan shall specify a maximum number of years to be purchased, not to exceed five. Members must have attained age 50 and be eligible for retirement with the additional purchased service. The amount of service purchased cannot exceed the lesser of five years and one-fifth of the member's credited service.

Actuarial Accrued Liability - The difference between the actuarial present value of future benefits payments and the actuarial present value of future normal costs. Also referred to as "accrued liability."

Actuarial Assumptions - Estimates of expected future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Demographic estimates (rates of mortality, disability, turnover and retirement) are generally based on past experience, modified for projected changes in conditions. Fiscal estimates (salary increases, inflation and real investment return) consist of the underlying rates in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method - A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future benefit payments" between future normal cost and actuarial accrued liability.

Actuarial Present Value - The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest and by probabilities of payment. Also referred to as "present value."

Actuarial Value of Assets - The value of current plan assets recognized for valuation purposes.
Amortization - Paying off an interest-discounted amount with periodic payments of interest and principal, as opposed to paying off with a lump sum payment.

Experience Gain (Loss) - A measure of difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

Normal Cost - The annual cost assigned, under the actuarial funding method, to current and subsequent plan years.

Unfunded Actuarial Accrued Liability - The difference between the actuarial accrued liability and actuarial value of assets. Also referred to as "unfunded accrued liability."

[^0]:    * included with service retirements
