## Plan Description:

The data gathered in Connecticut reveals there are approximately 71,000 active sub-prime mortgages, with outstanding loan balances totaling more than \$15 billion. Over 8% of these mortgages are seriously delinquent (over 90 days) and about 21,000 adjustable rate sub-prime mortgages will reset to a higher interest rate between October of 2007 and 2009. These mortgages are concentrated in communities with a higher than average number of low- and moderate-income households, minority households and affordable single-family housing. The areas of greatest need include the following communities: Bridgeport, Waterbury, New Haven, Hartford, New Britain, Meriden and Stamford and second tier communities include: New London, Norwich and Danbury. These areas were chosen because they were considered to have the greatest percentage of home foreclosures; the highest percentage of homes financed by a sub-prime mortgage related loan; and were identified by the State as likely to face a significant rise in the rate of home foreclosures. A large number of borrowers took adjustable rate mortgages with a low initial interest rate that reset to a much higher interest rate within a two to three year period. These borrowers anticipated refinancing prior to their monthly payments increasing. However, refinancing is now often not available due to the tightening of credit standards. As a result many borrowers are now exposed to significant payment increases and possible default.

## Recovery Needs:

It is the State of Connecticut's belief that by targeting those communities with the greatest need, and working with them to identify and target specific neighborhoods, we can be successful in having the greatest impact on stabilization overall. The State has determined that the most appropriate way to use these limited resources is to initially allocate the majority of its NSP funding to top tier communities in a non-competitive formula. Second tier communities have been selected for funding through a competitive rating and ranking process. Second tier communities have also been evaluated and awarded based upon the following additional criteria: geographical distribution, racial integration and leveraging of NSP funds. The demonstrated need, combined with the ability to have a significant impact in these communities, justifies the targeted investment in the aforementioned communities at this time. NSP communities are expected to build on existing neighborhood strategies and utilize local public and private partnerships to enhance their capacity to acquire, rehabilitate, finance, and market available properties.

As part of Connecticut's recovery program, the State initiated a refinancing program to assist borrowers who used a sub-prime mortgage for a housing purchase, as well as develop mortgage programs that can serve as a reasonable substitute for the credit once available through the sub-prime mortgage market. The CT FAMILIES Program was designed to implement that recommendation, New Programs to Address Sub-Prime Crisis in Connecticut. Connecticut also offers newer programs to specifically address the sub-prime crisis such as: the EMAP provides financial assistance for up to five years to Connecticut homeowners suffering from a temporary financial hardship, who have fallen behind on their mortgage payments, and have received a notice of foreclosure action from their lender and the HERO loan program which aims toward owner relief through the purchase of mortgages directly from lenders and the modification of those mortgages into affordable plans.

In addition, Governor Rell has urged the HUD Secretary to temporarily modify the regular Community Development Block Grant program to allow those cities and towns not receiving NSP funds to undertake similar activities and expand income limits to address the sub-prime crisis within their communities. The State will further attempt to address neighborhood stabilization in small towns through the 2009 Small Cities CDBG funding round. Priority status will be given to communities which seek to address NSP-related activities such as, purchase and rehabilitation of foreclosed or abandoned properties, within existing CDBG rules and regulations.

The State is limiting administration to 7.5% of the total NSP grant award, thus making more dollars available for program activities. The State will use program income and recaptured funds to reward performance.

## Progress Toward Activity Type Targets

## Progress Toward National Objective Targets

### Overall Progress Narrative:

Obligation Date: 9/9/2010 Contract Date: 3/9/2013

Most communities have made further progress through acquiring and rehabilitating properties. Communities have expended and drawn down funds pertaining to administration, acquisition/rehabilitation, and demolition. One community has demolished a property and will utilize NSP funds for redevelopment. The communities have set goals in place regarding future disposition. It is anticipated that a significant number of activities that are underway will be completed in the next quarter, and draw downs are anticipated to be substantially higher than those to date.
